

Access Compliance Consulting

Architect | CASp

Advancing Accessibility
in the Built Environment
by providing services that deliver results
to achieve compliance with
federal and state accessibility regulations

CODE CONSULTATION

Understanding the application of federal and state regulations is a daunting task. We specialize in providing technical assistance and consulting services for HUD Section 504, the Fair Housing Accessibility Guidelines, the 2010 ADAS for Accessible Design, California Building Code Chapters 11A and 11B, Tax Credit Allocation Committee Regulations, and the Unruh Act for senior housing. Your success in achieving access compliance is our mission.

PROJECT CONSULTATION

Collaboration with architects, engineers, interior designers, and other design professionals during the schematic design through construction document phases is essential in achieving full compliance for accessible design and construction. We put thirty-plus years of experience to work to provide a careful review of plans, specifications, submittals, and associated documents in coordination with the design team to ensure compliance with the applicable accessibility regulations and building codes for your project.

FIELD INSPECTIONS

We offer field inspection services to ensure access compliance with federal regulations and state building codes during the various phases of new construction and alterations. We'll work with you and your construction team to assist in achieving access compliance in the field.

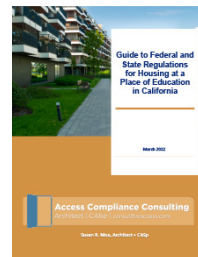

CALL TODAY AT 916.833.6479
OR GO TO CONSULTFORACCESS.COM

TRAINING

We provide live 90-minute webinars that cover a variety of access compliance topics. We can also develop customized sessions at your request.

PUBLICATIONS & GUIDES

The series of eBooks provide in-depth scoping information to determine which federal and state regulations and codes apply to a project.

ABOUT

Susan Moe is an architect and CASp with over thirty years of experience analyzing access compliance regulations, code development, and accessibility training.
